La partie Temps Réel est trop courte

a bit too dense when you are not really used of the topic, making it difficult to understand.

For me NAND flash session was not very useful, an introduction is good but one day on this topic is too long. I know that there is a 4-day version of this training, so why not leave the choice between 4 and 5 days for each training session ?

How was the duration of the course?

Too short.: 1	0	0%

3	6	85.7%
4	0	0%
Definitely too long. : 5	0	0%

Comments and suggestions

Très bien

A bit more time would be necessary to have a perfect understanding of all topics

Please tell us why you need or don't need paper printed materials

Save the planet! :) As soon as we can follow on the PC it's just fine.

Les documents sont bien, j'ai pris peu de note, je pense qu'une version électronique est suffisante

As we work on laptops with only one small screen, it would be difficult to handle the electronic version to follow the labs. I eventually suggest to remove the slides of the lectures that is less important (even if we can make notes at appropriated section) but keep the paper for the labs.

To me, it's not really necessary to have a printed version, we will not use it afterwards

I think the printed version of the lab is usefull. It is a good idea to not print the the slide (after the training we will search information only in the electronic version)

How knowledgeable was the instructor?

No problems !

How useful were the training labs?

Comments and suggestions

Très complet, instructif

We have discovered all the process of the development from scratch, which is fine. It maybe won't help for what the company does, but nice to learn the whole process, and understand it is valuable for our general culture of developers.

How difficult were the training labs?

Too easy: 1	1	14.3%

Comments and suggestions

a bit too long, for the time given

Was enough time dedicated to practical labs?

Definitely too much time for labs: 5 **0** 0%

Comments and suggestions

I think you now get it.

It's good to alternate between lectures and lab, especially after lunch :-)

I would prefer to have a bit more time for practical lab and less time for lesson.

How well was the course organized (program, registration, schedule...)?

Not well: 1 **0** 0%

4 **1** 14.3%

Very useful.: 5 **2** 28.6%

Comments and suggestions

I can't see the usefulness of it right now and for short future, but still very interesting for long term future.

For me I did this training to be able to support my customer in their linux development, so it will be useful but I will not use this knowledge every day.

What part(s) of the course did you like most?

Filesystems

Labs

debugging and sound

Build an image from scratch, so first three days

What part(s) of the course did you like least?

Flash and UBI fs (too complicated)

flash part
