## Please tell us why you need or don't need paper printed materials

For me it's easier to learn from printed documents, and leaving important notes.

Printed slides were useful for taking additional notes about topics. Because we were working in groups it is easier to go back and look previous slides if you have lost focus. Also, it is easier to discuss problems with other person in group if you have printed materials.

Not necessary.

Maybe several copies only for participants who request paper.

Create more smaller labs. If instructor speak about something do short lab immediately after.  
Repeat some things more frequently.

## What part(s) of the course did you like most?

Work with the hardware.  
I really liked labs

## What part(s) of the course did you like least?

To long speaking sessions.

## Comments and suggestions

I think its really great course, but i thin duration of course is short for this amount of information. You should add 2-3 days to this course. But everything else is realy good. Ty

Some terms in presentations took a lot place but during labs we do not exercise them. If you do not have labs to cover it, just mention them. E.g. if we use one way to do remap memory explain only it.
