

# Bootlin training course evaluation

8 responses

## How did the course meet your learning objectives?

8 responses

## Comments and suggestions

2 responses

maybe an update of linux practices (terminal commands, directory) could be useful.

Il nous a manque du temps en fin de training pour creer une petit application appelant le API du Kernel.

## How was the duration of the course?

8 responses

Fine but definitely VM and in-experimented Command line students didn't help. Some parts of the course can be done faster (not sure we need to detail entirely the copmmands arguments during the lecture as we spend time on them during labs)

One week training is enough but it's requiring to do not spent time on topics not related to topics even if it is following to questions from the trainees. Maybe sometimes clearly said that it is not part of the training...

Le cours est vraiment dense et pour des novices comme notre groupe je pense qu'il nous aurait fallu quelques jours de plus.

## How useful were the training materials?

8 responses

## Comments and suggestions

2 responses

I won't be able to learn with only the material.

Certains slides sont pas très lisibles, sans couleurs, polices petits  
Les supports de lab sont difficile pour tourner les pages

## How important are printed materials?

8 responses

## Please tell us why you need or don't need paper printed materials

5 responses

Usefull to takes notes on it

I highlight in the documents important parts to find them back more quickly

A labs paper allow me to add annotations. Maybe keep some place in the text to allow us to write annotations. A complete exhaustive and corrected version of the lab paper could be useful, because there will be some delay between the course and the applications.

training material is useful as it allow to navigate more easy from topics and add notes

J'ajouterais que pour la fonction copier/coller de certaine commande le support digital est plus adapté

## How knowledgeable was the instructor?

8 responses

## Comments and suggestions

2 responses

Les discussions et les 'questions réponses' pendant la formation sont très intéressants et enrichissants

Au vu de mon niveau les formateurs etaient des puits de science.

## How much value did the instructor add to lecture materials?

8 responses

## Suggestions and comments

0 responses

No responses yet for this question.

## Was the instructor helpful with practical labs?

8 responses

## Comments and suggestions

2 responses

yes, but sometimes we are not all synchronized at the end of the lab and a guided correction on screen could be useful.

Il pourrait être intéressant que le formateur nous laisse quelques minutes pour démarrer le lab, puis réalise après quelques minutes ce même lab sur écran géants. Cela permet d'expliquer chaque étape si elles ne sont pas bien comprises, realigner chaque personnes du groupe et maitriser le temps du lab.

Nous n'avons pas fait tous les lab par manque de temps mais voir le resultat final nous montre au moins l'utiliter de ces lab.

## How useful were the training labs?

## How difficult were the training labs?

8 responses

## Comments and suggestions

1 response

Les principes liés à Linux sont compréhensibles mais de mon côté, j'ai perdu du temps avec la syntaxe des commandes ligne.

## Was enough time dedicated to practical labs?

8 responses

## Comments and suggestions

3 responses

Une démonstration ou des corrections de labs sont nécessaires

mix between lecture and labs is well split

La moindre erreur fait perdre un temps précieux difficile à rattraper. Encore une fois une démonstration sur écran géant permettrait de realigner l'ensemble du groupe.

## How well was the course organized (program, registration, schedule...)?

8 responses

## Comments and suggestions

1 response

Manque une présentation générale de programme au début de la formation  
Au mieux de préciser les horaires pour éviter d'attendre les stagiaires

## How much did you learn?

8 responses

## Comments and suggestions

0 responses

No responses yet for this question.

## How useful should this course be in your daily job?

8 responses

## Comments and suggestions

2 responses

Hope will be useful for the mid term developments

I won't use it in short term. I ask the training for my global knowledge.

## What part(s) of the course did you like most?

5 responses

labs

Application debugging and real time (last day)

build a complete system from scratch

All

Les training lab

## What part(s) of the course did you like least?

3 responses

struggling with the VM

real time

Le cours sur la partie memoire nand etait tres interessant mais un peu eloigne du training

## Overall rating

8 responses

## Comments and suggestions

1 response

I put only 5 as we were not able to cover all the topics of the training. Responsibility is split between us and the class, but you are the time keepers and maybe sometimes remind that you can't spend 15 minutes on explained how a hand flah is working for examples.  
Otherwise, I would put more, as you were very valuable

## Further training needs?

8 responses

## Comments

Yocto

not for the moment as I don't have plan to use it in a short term.

More than training, I will need to practice

Peut etre un training Yocto qui est utilise chez nous.

## What reasons prompted you to choose Bootlin?

8 responses

## How did you first learn about Bootlin?
