## Comments and suggestions

Une réponse

I've learned a lot but desgracefully it is not enough. In some topics, we've only scratched the surface

How was the duration of the course?

## Comments and suggestions

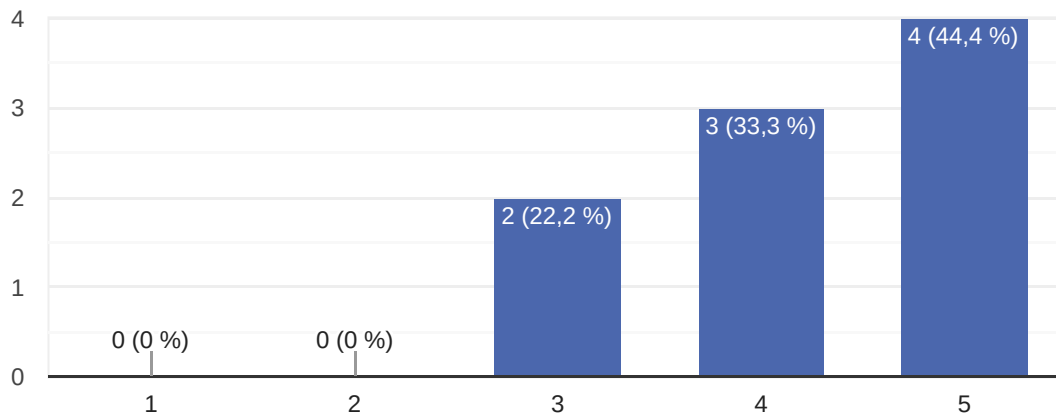

2 réponses

It is a short course for the topic that we are talking about.

The duration is ok, with less time will be impossible to learn enough about Linux Kernel

## How useful were the training materials?

I think that in 2019 we could safely avoid to print paper and source code :-)

the more usull things are the reference to the articles and web pages to find information

## How important are printed materials?

9 réponses

## Please tell us why you need or don't need paper printed materials

6 réponses

i like to take notes

It's okay to have the lab book printed but printing the whole slides could be avoided.

You can print just on per-request basis

A lot, because i like to take notes on it.

I like to write notes on paper, for clarifications

it's more comfortable, because we only have a laptop with one screen, but is not indispensable

## How knowledgeable was the instructor?

## How useful were the training labs?

9 réponses

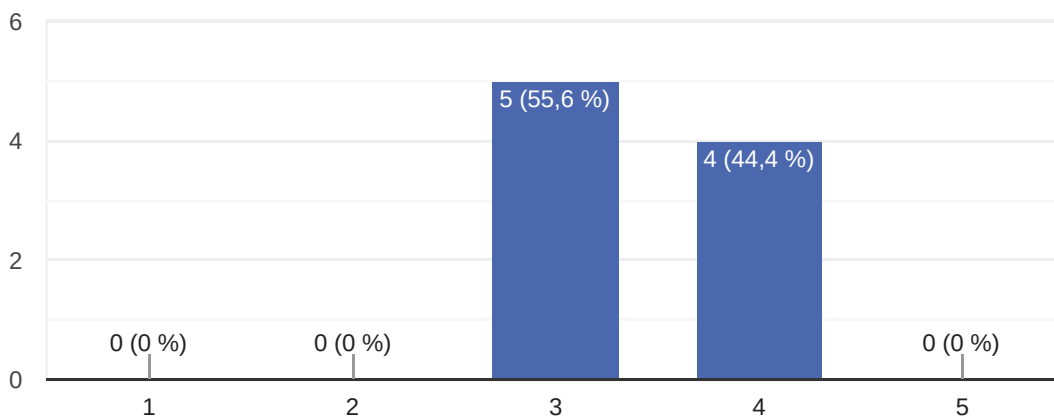

## Comments and suggestions

Une réponse

The Labs are the key to understand the keys

## How difficult were the training labs?

9 réponses

## Comments and suggestions

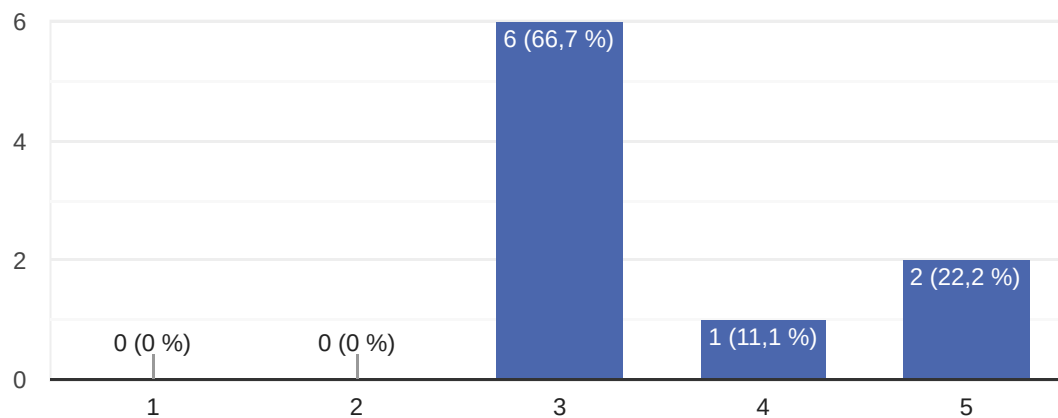

2 réponses

Depending on your background, it can be difficult or not.

Some more tips would not hurt

## Was enough time dedicated to practical labs?

Unfortunately

## What part(s) of the course did you like most?

3 réponses

Practical parts

labs

I like the structure of the course because all the parts are linked, normally when I work I don't know how to add more features to the code in the right order.

## What part(s) of the course did you like least?

## Comments

Une réponse

I would like a training of existing frameworks because I guess normally the programmers construct drivers are attached to different complex frameworks (v2l2, usb, ...).

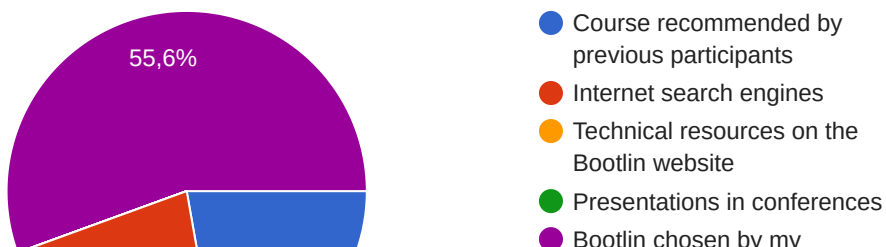

## What reasons prompted you to choose Bootlin?
