How did the course meet your learning objectives?

6 responses

Comments and suggestions

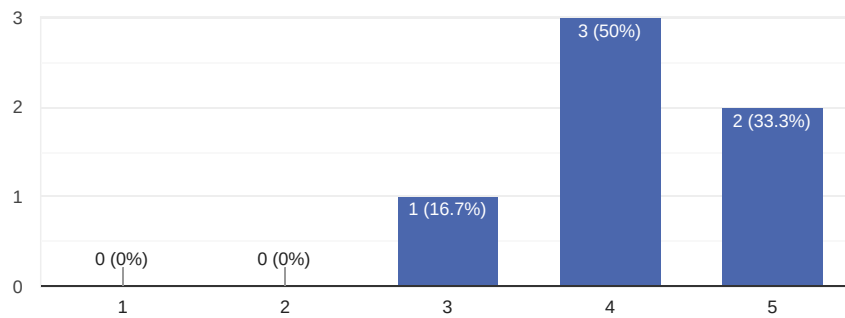

2 responses

hard for beginners, too much informations to handle

A very complete course that goes beyond my expectations. I wish I could try the course labs on a real device.

How was the duration of the course?

6 responses

Comments and suggestions

This training could be split into two trainings, like basics and then some specific things, with more exercising

This is probably related to the learning conditions during the COVID-19 (the instructor doing the lab for us)

How useful were the training materials?

6 responses

Comments and suggestions

3 responses

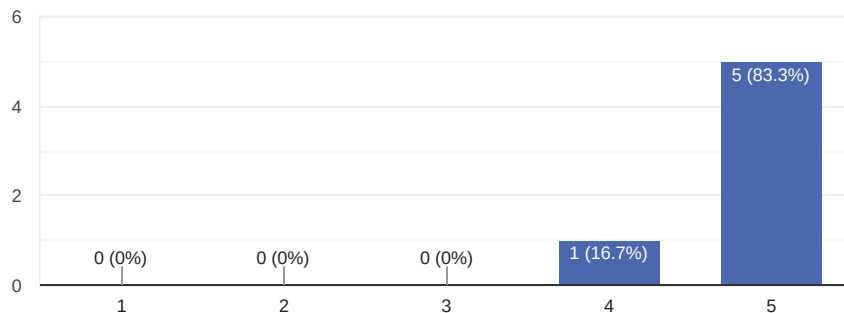

Maybe that more practice can be a good thing

The training materials cover a lot of topics and can be used as a reference after the training since they are being actively updated.

The exercises are well done and the power point contains a lot of information (maybe too much?)

How knowledgeable was the instructor?

6 responses

Comments and suggestions

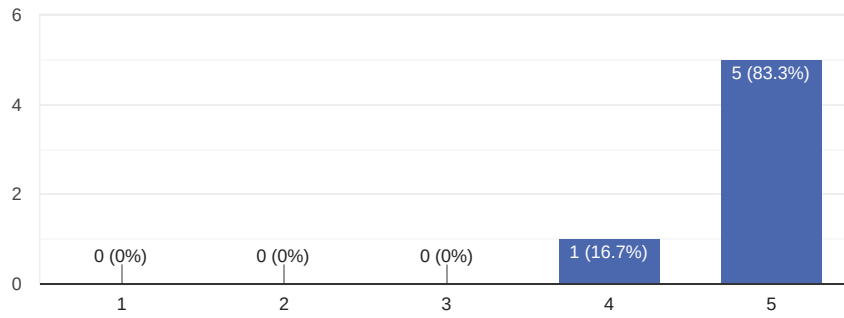

2 responses

Less divergence during explanation and it will be awesome

I wish I could work with him, he seems to be a wonderful person ;D

How much value did the instructor add to lecture materials?

6 responses

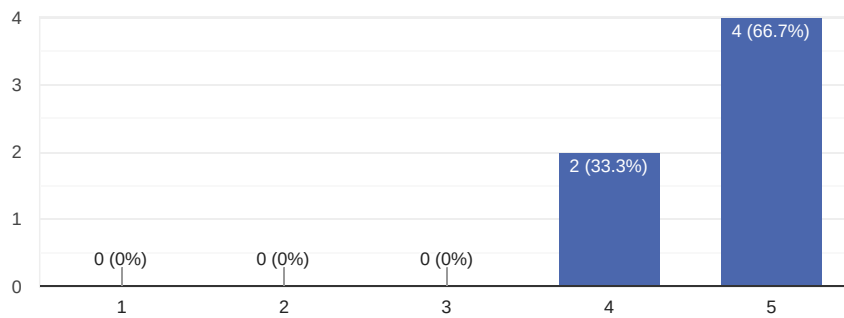

Suggestions and comments

1 response

The instructor was really helpful to me and I would definitely have learnt a lot less I he has not been there

How useful were the practical demos?

6 responses

Comments and suggestions

2 responses

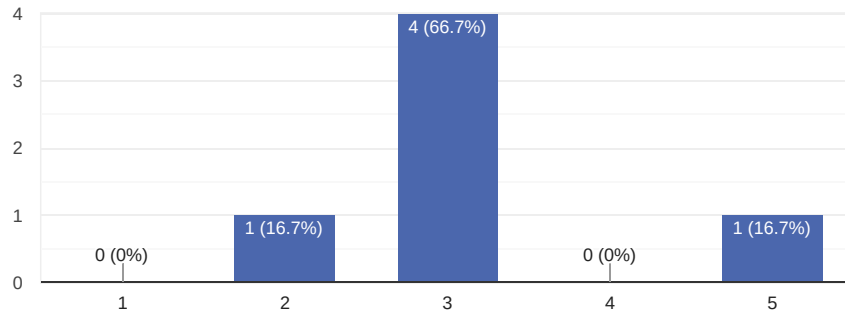

if only we could do same manipulations as the instructor

Explain the thought process while detecting and solving an encountered problem rather than solving it then explaining.

Was enough time dedicated to practical demos?

6 responses

Comments and suggestions

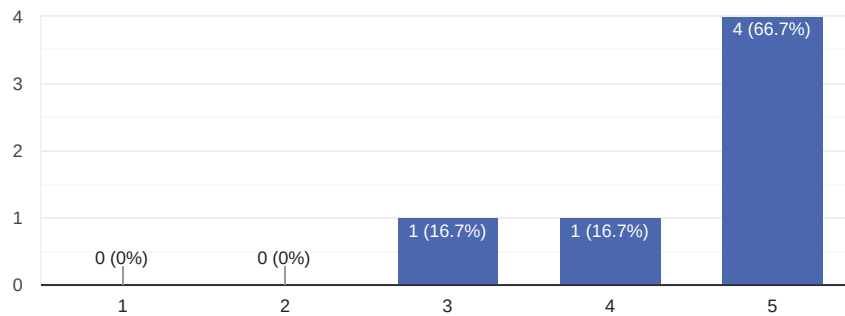

2 responses

In my opinion some menuconfig could be a little bit more explained during demos

It was hard to stay focused

How well was the course organized (program, registration, schedule...)?

6 responses

Comments and suggestions

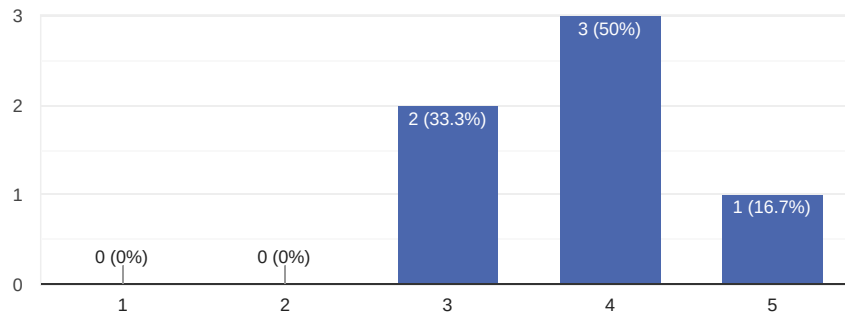

1 response

I would have preferred to have the lab on the morning, to be more attentive

How much did you learn?

6 responses

Comments and suggestions

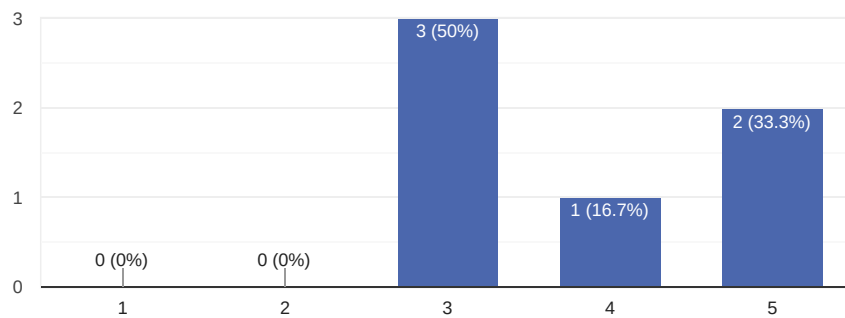

2 responses

got some basics, to keep learning by myself

For a beginner, there seem to be a little too much information to retain.

How useful should this course be in your daily job?

6 responses

Comments and suggestions

2 responses

I still dont wont work in embedded linux projects, but i think this course covered all

I am not currently working on embedded linux systems.

What part(s) of the course did you like most?

5 responses

Bootloader

the never gonna give you up song

All the configuration needed for the flash

The daily challenges and quizzes

The part dealing with the linux kernel and how to cross-compile it

What part(s) of the course did you like least?

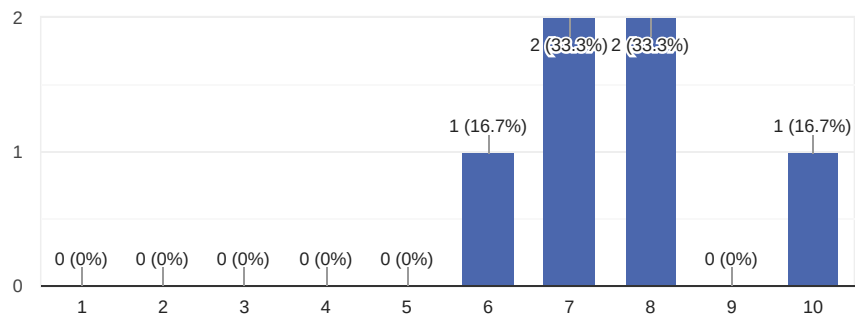

2 responses

when taking too much time reading slides

block files system

Overall rating
