L'absence de TP concret à cause de la situation actuelle ne m'a pas permis d'assimiler correctement les différents éléments présentés pendant le cours. Je ne remets aucunement en question le fond, mais la forme ne me convient pas. J'apprends en pratiquant

Rien à dire sur le contenu.

## How was the duration of the course?

## Comments and suggestions

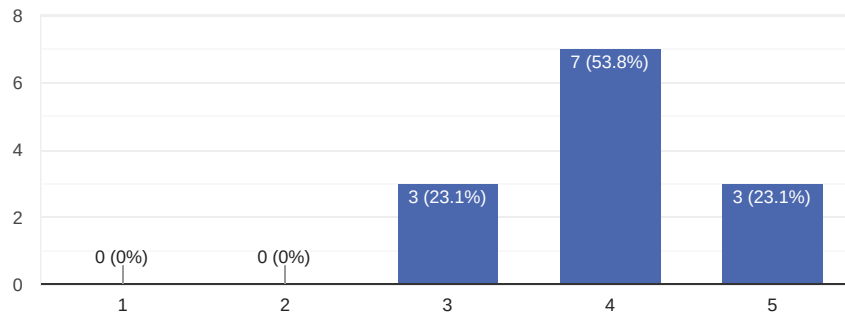

1 response

C'est une bonne idée de ne faire qu'une demi-journée de formation/jour mais le cours est malgré tout un peu long (cinq 1/2j aurait été mieux à mon sens)

### How useful were the training materials?

Online training

Would have been better with a real board, but Qemu does a good job

VM to practice

### How knowledgeable was the instructor?

13 responses

### Comments and suggestions

2 responses

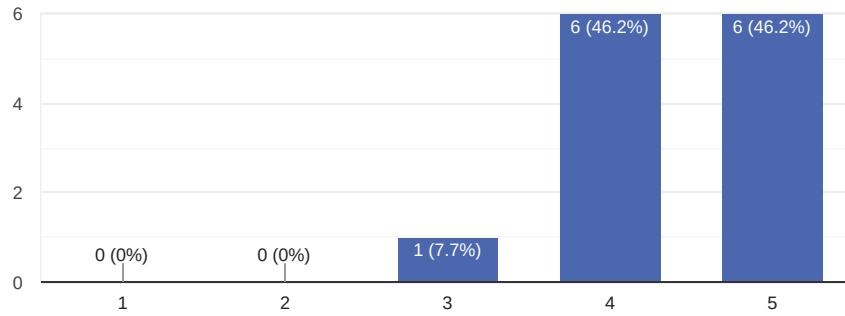

Rien à dire là dessus, les questions étaient comprises et répondues convenablement.  
Lorsqu'une question posait problème, elle était répondue le lendemain

Rien à dire, les explications étaient très clairs, le formateur maîtrise le sujet.

### How much value did the instructor add to lecture materials?

Because of the format (video conf), we didn't get to follow the same steps as the instructor in real time, and I think it was lacking. It isn't however the instructor's fault at all, so no worries :)

Comme dit précédemment, bien que je comprenne que c'est n'est pas de la responsabilité de bootlin, le format d'apprentissage à distance et de TP fait par l'instructeur ne me permettent pas de s'appropriier le TP et d'assimiler

Was not able to do practical demos

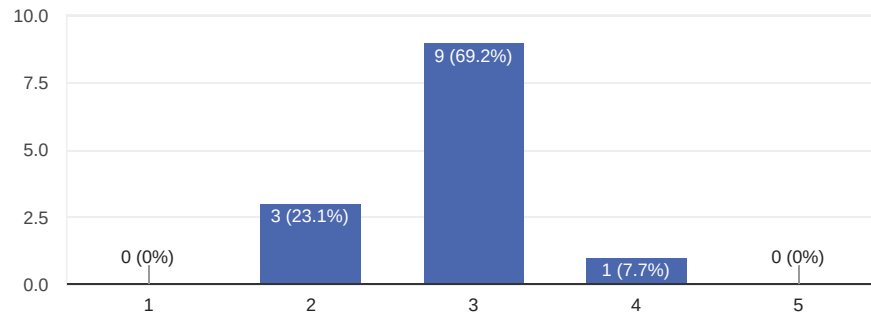

It would be better to practice ourselves in the meantime

Contexte particulier, pas de travaux pratiques possibles en période de COVID et difficile de les faire en dehors des cours.

### Was enough time dedicated to practical demos?

13 responses

### Comments and suggestions

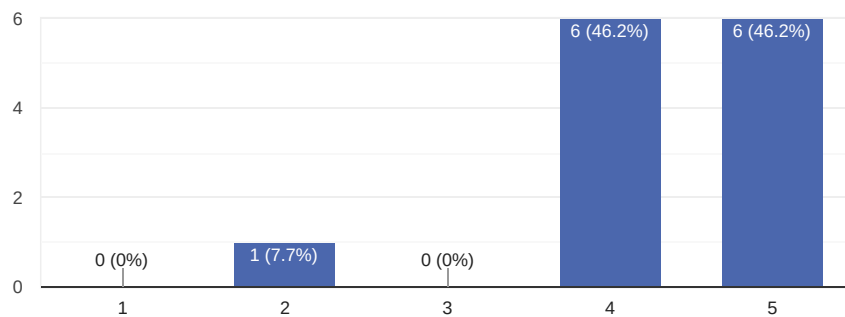

2 responses

Related to previous answer

It may be a good idea, even in remote sessions, that the students perform labs during the training session (maybe not all of them) to have more interactive sessions

### How well was the course organized (program, registration, schedule...)?

13 responses

### Comments and suggestions

### How much did you learn?

13 responses

### Comments and suggestions

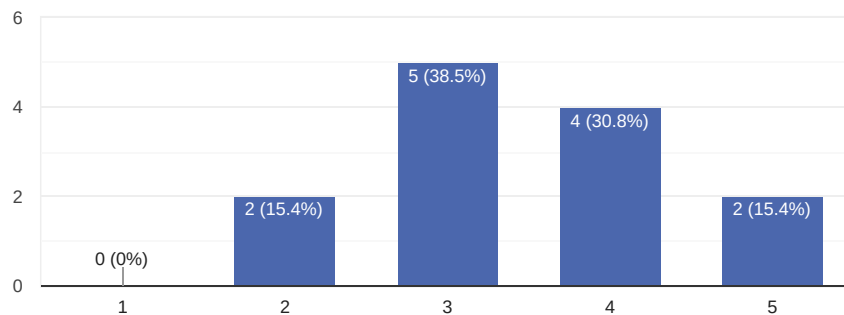

2 responses

Encore une fois la faute au format, qui n'est de la faute à personne

A permis de consolider mes bases précédemment acquises et de découvrir/comprendre certains aspects du système linux embarqué que j'avais seulement survolé pendant mes expériences professionnelles.

### How useful should this course be in your daily job?

13 responses

### Comments and suggestions

1 response

Mon travail reste principalement sur des micro 32bits temps réel.

### What part(s) of the course did you like most?

8 responses

La partie Yocto

Linux trivias

Bootloader part

Learning about cross-compiling, setting debuggers on a target, using buildroot

what choices makes me have a more powerful kernel and a more organized rootfs

everything was usefull

Real Time Linux And Buildroot

La mise en place du système Linux from scratch sans les outils buildroot, etc..

### What part(s) of the course did you like least?

8 responses

la partie historique

Compilation time

Filesystem part

the part concerning NAND memories

The fine details in the file systems like the logic structure of a NAND

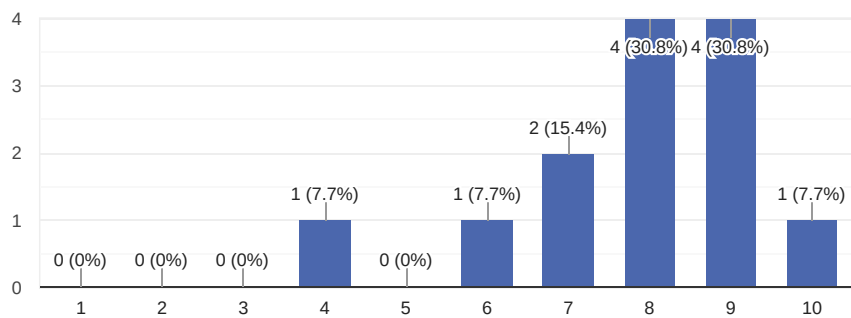

part on the nand flash is very usefull but it's not easy to stay focused

Flash Storage and Filesystems

rien de particulier.

### Overall rating

Si je devais résumer la globalité de ma pensée, la même formation en physique avec les TP fait par chacun m'aurait été infiniment plus bénéfique. Encore une fois, je ne blame pas Bootlin, qui n'est en rien responsable de cette situation, mais j'ai la sensation de n'avoir par conséquent pas retenu grand chose

### Further training needs?

13 responses

### Comments

6 responses

Using Yocto

i don't know

En physique avec pratique certainement, en distanciel non

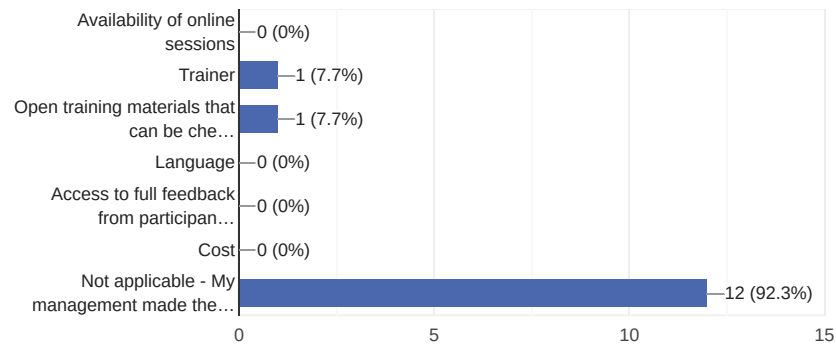

kernel driver development and yocto

Kernel drivers and modules development

Yocto

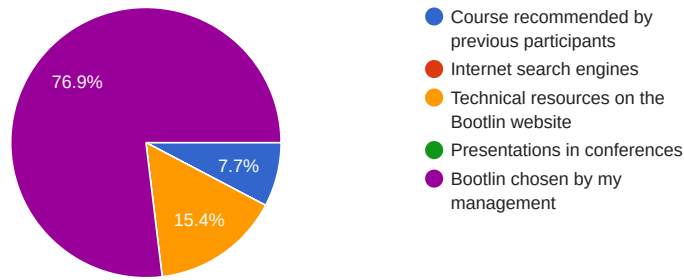

### What reasons prompted you to choose Bootlin?

13 responses

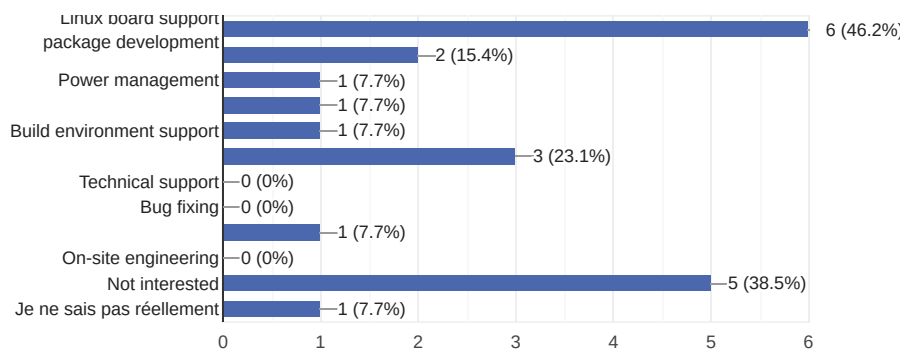

### How did you first learn about Bootlin?

13 responses

### Interested in other types of embedded Linux engineering services?

13 responses
