Making the course online, makes harder doing the demos and doubs can't be solved so easily

Get a new nunchuk! (just kidding haha)

Was enough time dedicated to practical demos?

9 responses

What part(s) of the course did you like most?

3 responses

lab4

Very organized, to the point, and receptive to questions

I enjoyed getting into the nuances of Yocto, especially with regards to adding recipes and layers.

What part(s) of the course did you like least?

3 responses

Nothing!

While I enjoyed the practical labs, I did not find them immediately applicable, as I do not do any work on a Beaglebone. It was nice to see the theoretical content applied, however.

	1 (11.1%)

Comments and expectations

3 responses

good training

Not interested for the moment.

This course was the exact depth and breadth of information I am expecting from a week-long seminar. My previous course with Bootlin was the Embedded Linux course, and I found that one to be too broad in its scope. However, this one, given its more specific nature, was a lot easier to follow. Furthermore, it was a lot more applicable to my day to day job, which is always a benefit. Great job Maxime in the training, and I hope to experience other Bootlin sessions in the future.
