It was a bit fast for me. But overall, it is very good training. Well organized, very good content. Definitely recommended for starters on Buildroot.

Training slides ,lab document was awesome.

Very useful. A lot of details/tips well explained.

It was very useful .

### How useful were the practical demos?

9 responses

### Comments and suggestions

3 responses

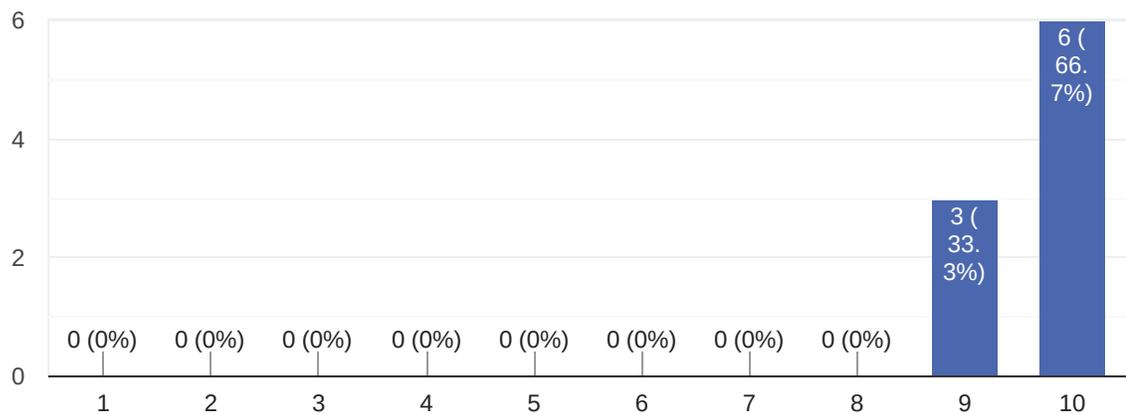

The demos are well chosen to complement the lectures. For me, watching the trainer doing the practical demos is not enough, I think it is important the participants reproduced the demos on their side to practice the commands and steps and better understand the usage of Buildroot and how it works.

The demo is real. However, it would be better if there was enough time for us to practice as well.

It explained the usage very well.

### How would you rate the overall organization of the course?

Again, it was a bit fast for me, a lot of content to digest; however overall, it is very well organized and well balanced. Having the course split over 5 half-days allows time to digest between each parts and also time to work on the practical demos and review the content.

Trainer is definitely a technical expert on the topic. He also has good communication skills. He does not just read the slides, he also adds a lot of details to clarify the explanation of the topics. He clearly answers the questions.

Thomas's explanation is clear, and the speech speed is smooth.

### How did the course meet your learning objectives?

Thanks to the training I feel confident to work with Buildroot.

more labs

The materials are good! Just a minor recommendation, in the labs, add 1,2,3... in the each step, with remarks of mandatory or optional operations if necessary, for easy reading and understanding.

What part(s) of the course did you like most?

7 responses

Building nInvasers

Great content, great trainer. Overall training was good for me. The topic is well covered.

the practical labs

Integrating new package in buildroot

Buildroot source and build trees

The practical demo, especially "New package in buildroot"

Practical labs

What part(s) of the course did you like least?

3 responses

I like most of part in this training, but If I must choose one, I choose "Understaning Buildroot internals" part. It was little difficult to understand for me.

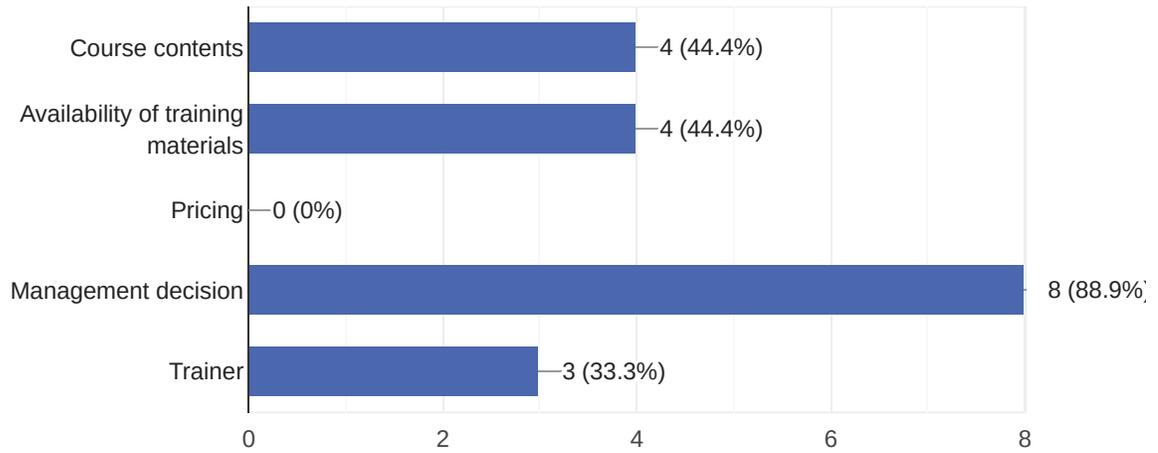

The training being online, it is sometimes difficult to stay focused for 4 hours "alone" in front of the computer screen.

no

### What reasons prompted you to choose a Bootlin course?

9 responses

### Comments

1 response

It is a really fruitful training. Thank you!

### Further training needs?

3 responses

PREEMPT RT linux

Yocto

I would be interested in attending training topics related to Embedded linux/yocto .
