Would be nice to distribute the lab solutions as the solutions with the labs. The lab demos go very quickly. I was able to reproduce them, but I'm not super good at `make` so I struggled to come up with the syntax even though I knew what needed to happen. It was shown in class but so fast I couldn't write it down.

All relevant topics covered

Few slides need updating but overall excellent

I felt one week was not enough it could have been spread out.

Very punctual. I appreciate that!

Extremely clear in explanations, with a true desire to transmit his knowledge. High expertise level on the subject. Always demoing the content of the slides. Thanks for his investment!

How did the course meet your learning objectives?

What part(s) of the course did you like most?

5 responses

app dev, sdk topic and overall buildroot overview

Lab session

Basic details of buildroot, Lab and QA sessions

Very visual with all demos.

Practical examples were very useful

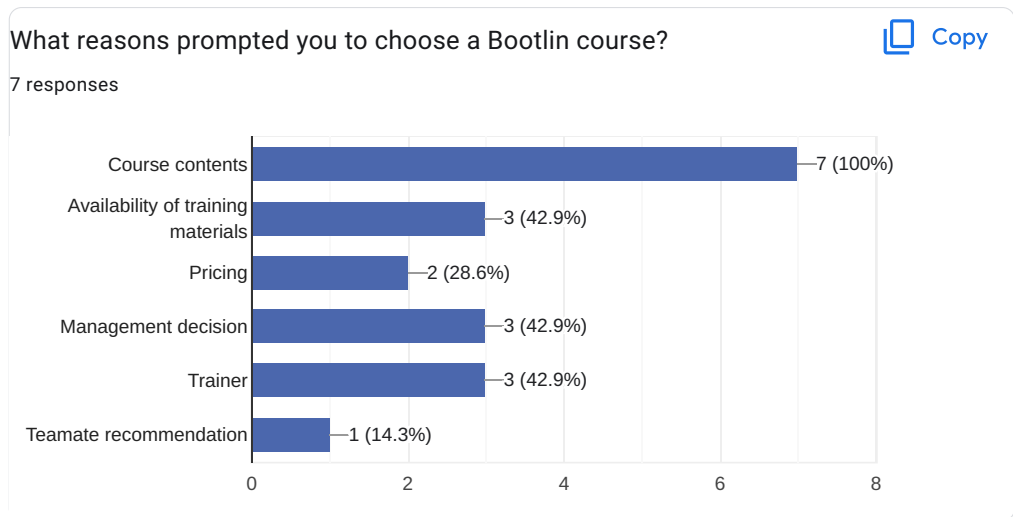

What part(s) of the course did you like least?

2 responses

while the license info stuff is worth mentioning i didn't think we needed to do a lab or cover it twice

duration of the course
