Demos allows to follow and understand things, nice ! Maybe some practical one could be nice (but it may bring the course to 5 days)

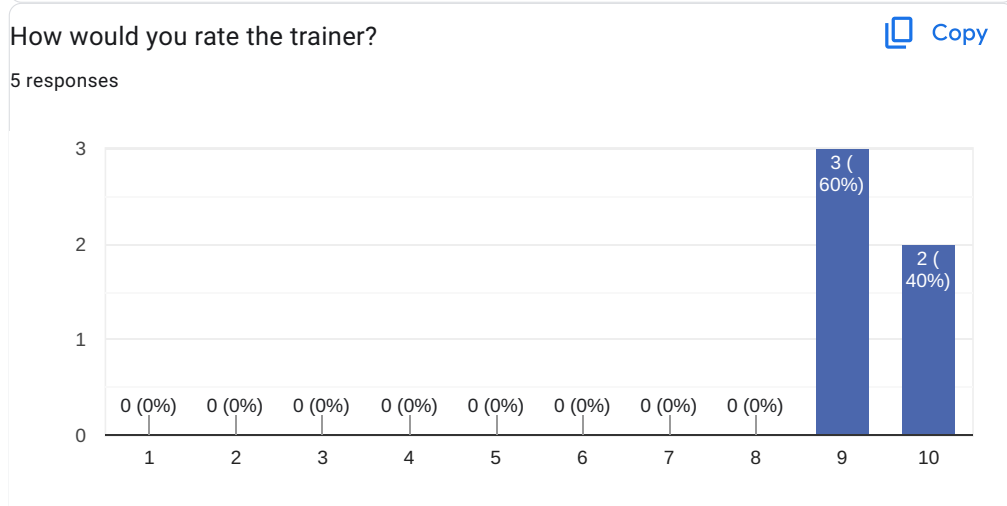

I'm not sure the demos were useful when explaining code. It's not easy to stay focus and I think people can do this on their own.

- What part(s) of the course did you like most?**
 5 responses
- Kernel part (DRM)
 - The demos and code walkthroughs
 - DRM Kernel Aspects
 - The theoretical/scientific part at the beginning
 - Software aspects

- What part(s) of the course did you like least?**
 4 responses
- Initial "common knowledge" about image format, but just because I already know a big part of this
 - Image and Color Representation, but only because I new this part better than other parts of course.
 - The practical parts about reading code
 - Theory at beginning

Further training needs?

2 responses

Maybe something more detailed about DRM.
