How useful were the practical labs?

11 responses

Comments and suggestions

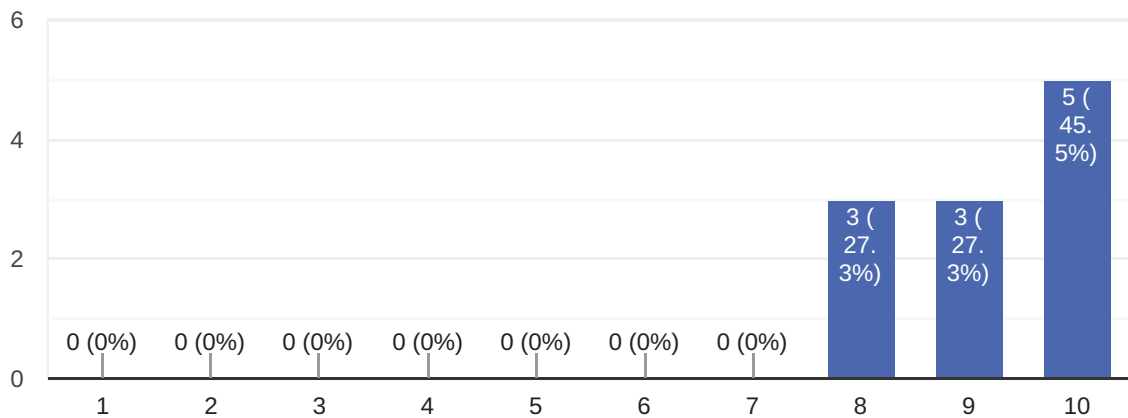

1 response

Practical lab material could be a bit more organized.

How would you rate the overall organization of the course?

11 responses

Comments and suggestions

1 response

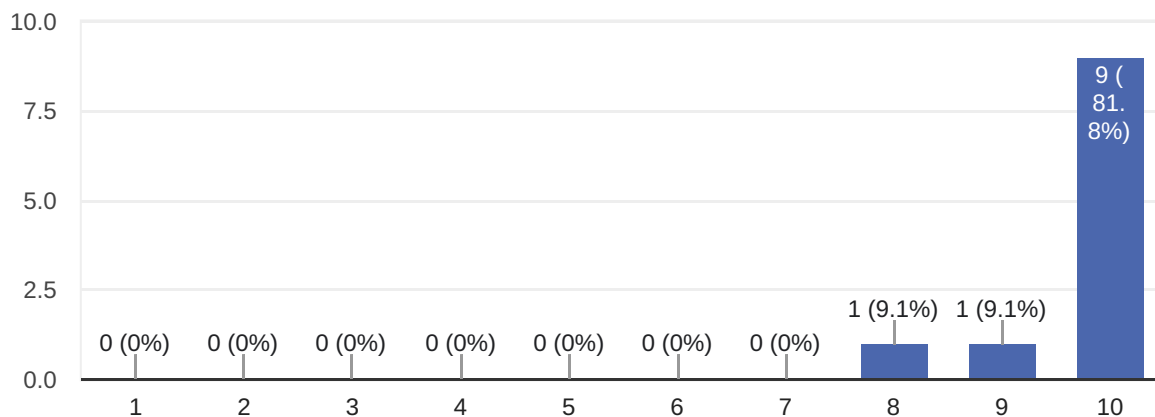

Because of our average knowledge level, I guess, instructor was not capable to cover whole agenda. But he focused in most important points for us

How would you rate the trainer?

11 responses

Comments and suggestions

2 responses

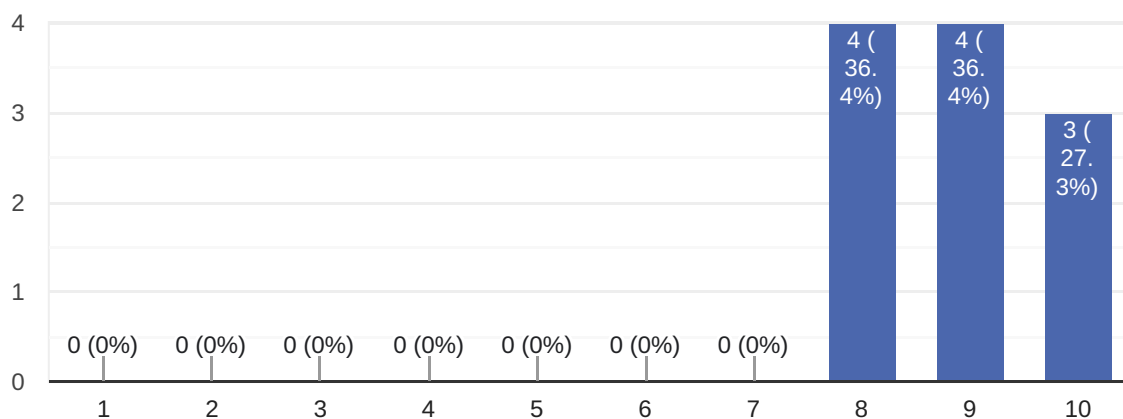

He was very flexible and adapted the pace of the training to our needs. Great job

He knows a lot about the matter and he is kindly and really open to clarify aspects and answer questions even though are not clever or relevant

How did the course meet your learning objectives?

It was quite difficult to understand everything. I don't have best english skills and when the matter is difficult, the matter becomes more difficult. But defenetly is not a problem from the Miquel, he is clear and excelent english speaker. I will need much more time to consolidate all huge amount of usable information.

What part(s) of the course did you like most?

6 responses

The labs guide the user very well in order to consolidate the knowledge of the lecture.

First day an a half

the labs

All the labs, specially related with Nunchuck

kernel frameworks

Practical labs

What part(s) of the course did you like least?

5 responses

Labs where useful but I would like it to be a little more guided by the instructor

nothing

Some Therorical explanations about Device Model . Slides were dense.

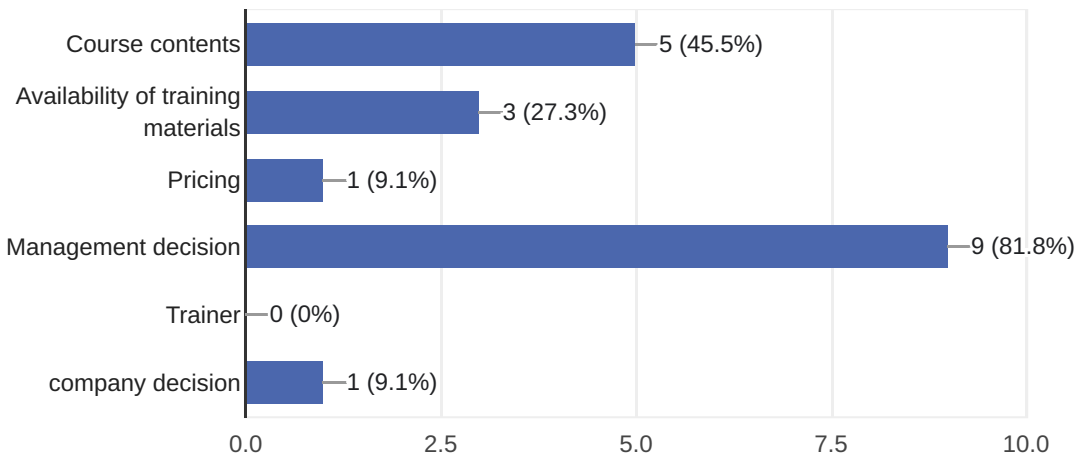

misc subsistem

Search for murky stuff that was 'just staring me in the face'

What reasons prompted you to choose a Bootlin course?
