A bit too fast, I would have liked to have at least 1 more day to consolidate the topics by doing exercises

I think we may a bit too ambitious to fit that amount of content in two days, 3 days is a better pace. Also should consider a course that focus on user space only, since while good knowledge to learn about, kernel space is not really where we do work in.

What part(s) of the course did you like most?

3 responses

labs are very good as it is practical

The labs related to the course and the knowledge of the trainer.

Userspace design consideration

What part(s) of the course did you like least?

2 responses

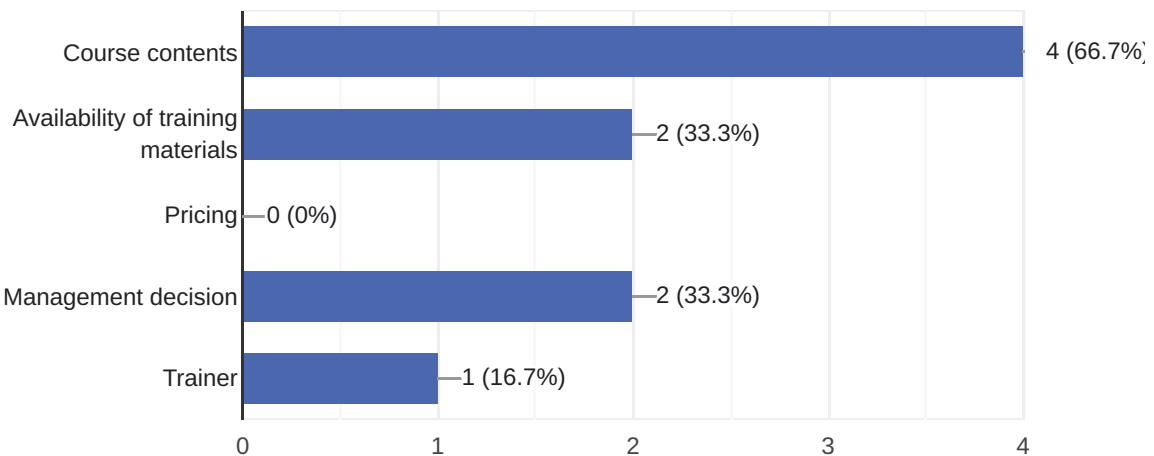

Lectures as they were sometimes difficult understand but it is complex by essence

none really!

What reasons prompted you to choose a Bootlin course?

I will recommend this training as it is unique to the whole =S= organization when dealing with RT dev in Linux.

Further training needs?

2 responses

I need consulting more than training as a follow up of this training

Real time networking, XDP
