Excellant,

It's an interesting and deep on the topic training with lots of practical examples.

Very dense, hard to keep the "big picture" in mind

How useful were the lectures?

Change your terminal with syntax highlight (Terminator, Fish) because it's hard to track/follow what happens due to the lag, visual/colorful clues may help

How would you rate the overall organization of the course?

I like that the instructor was able to answer to all questions asked by the audience.

How did the course meet your learning objectives?

I would have expected more about server setup, eSDK

What part(s) of the course did you like most?

5 responses

all parts were very helpful, most I liked the pratical insight given by the instructor

Debugging

I liked examples and hands-on labs.

Parts that were about deep understanding of the bitbake / oe stack (sstate caches ...)

I liked that the labs were shown by the trainer first answering a lot of questions and doing them later on by my own

## What part(s) of the course did you like least?

2 responses

KAS

For me as a Yocto beginner sometimes the explanations went to deep to follow always 100%. But that is probably not the case if you are not a Yocto beginner

What reasons prompted you to choose a Bootlin course?　　　　　📋 Copy

7 responses

Reason	Count
Course contents	6 (85.7%)
Availability of training materials	3 (42.9%)
Pricing	3 (42.9%)
Management decision	0 (0%)
Trainer	3 (42.9%)
Avaible dates	1 (14.3%)

Overall very nice course with lots of information

Further training needs?

2 responses

Of course, next year will be back, kernel driver can be an option.

More Yocto!!!
